

February 2017

CIB Programme Committee PC Commendation for Dr Miimu Airaksinen and Christiaan Bremmer

It is customary that the CIB Programme Committee in the beginning of the new year selects one or a few CIB Commission Coordinators (or Priority Theme Leaders), who receive a Commendation for extra ordinary performances or accomplishments in the previous year.

The 2016 CIB PC Commendation has been awarded to the Joint Coordinators of the CIB Task Group TG88 – Smart Cities:

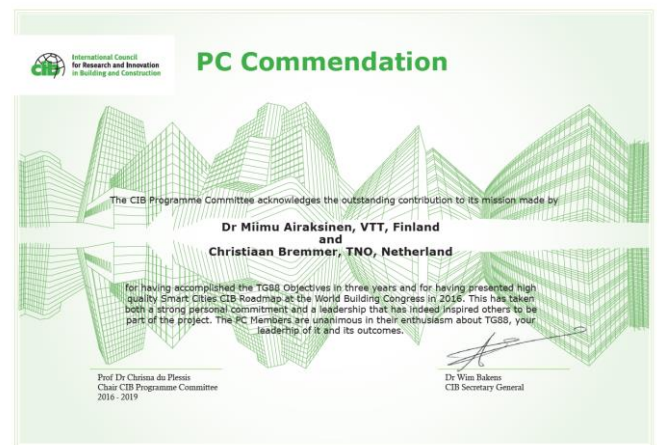

- Dr Miimu Airaksinen, VTT, Finland and
- Christiaan Bremmer, TNO, Netherlands.

In three years they have accomplished the defined TG88 Objectives and have been able to present a high quality Smart Cities CIB Roadmap at the World Building Congress last May/June in Tampere. This has taken both a strong personal commitment and a leadership that has indeed inspired others to be part of the project.

The Programme Committee Members were unanimous in their enthusiasm about TG88, the leadership of it and its outcome.
