

June 2017

Webinar announcement CIB TG83 e-Business in Construction September 13, 2017

Introduction

Task Group TG83 - e-Business in Construction invites you to join their Webinar, taking place 13 September. Join the Webinar to learn more about cutting-edge ideas and research industry activities of visionary academic researchers whose solutions get to the street as fast as possible. Contribute your knowledge and expertise to discussions on the links between building performance design, operation, optimization and the data being generated in all of these processes.

The webinar will be held at 13.00 – 14.30 GMT (15.00-16.30 CEST)

The topic will be:
Lessons for the future of data describing buildings and their performance.

Program of the Webinar

1. Overview of the construction industries current adoption of BIM in energy performance design and management of buildings.
2. Presentation of findings from investigation of BIM-operational performance monitoring and management link.
3. Presentation of proposals for future research around the responsibilities and standardization of information collection and storage surrounding building performance monitoring.
4. General discussion between participants
